

Green Gold Report – June 8, 2017 – WESTERN / CENTRAL

Hay Day is past and presently RFV are in the 150 range. This is just an update on the Western area. Final will be sent out on Monday.

SITE	RFV NIR	RFV PEAQ	Height	CP
Portage	N/A	164	26	N/A
Winkler				
CENTRAL AVERAGE	9	164	26	5
Roblin	164	203	19	24
Brandon North	156	203	19	20
Virден	137	149	31	20
Virден North				
WESTERN AVERAGE	152	185	23	21

The western area is reporting alfalfa in the early to late bud stage. For Portage it has entered the early flowering stage. I don't have the final RFVs for Central but will sent that out on Monday when available. With the rain this weekend it is unlikely that there will be any cutting till at least Sunday.
